Bachelor

- Applied Computer Science
- Media informatics
- Health informatics
- Digital Media Marketing
- Microsystems and Nanotechnology
- Applied Life Sciences
- Medical Sciences and Biosciences

Master

- Computer Science
- Microsystems and nanotechnology
- Applied Life Sciences

Students' voices

Yasemin Geiger, B.Eng.
Microsystems and Nanotechnology

"Today, 4 years later, with my degree in hand, I look at the great opportunities that are available to me, which are as varied and interesting as the study programme itself. Behind my success and my confidence are my professors, who come from the practice and have valuable contacts, but above all who know me personally and have always been at my side."

"The optimal organization of the study program ensures that study and career can be perfectly combined. In the lectures, the relevance of the topics becomes apparent at all times by means of practical references. As a special highlight, the out-of-campus event at the end of the course of studies offers the opportunity to gain intercultural experience."

Julian Sprengel, MBA
Marketing Management

University-economy interface

Students in companies

- Internships
- Thesis

KOSMO

Cooperative study model

- Studying and working in a company
 - Earn money
- Gaining practical experience
 - Make contacts
